1. This office action is response to Amendment after final filed Aug. 19, 2005.
2. **Examiner** has been called **Applicant's representative** twice on Oct. 21 and Oct. 26, 2005 to expedite the case. However, Examiner received no response.

3. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

5. Claims 1, 3-4, 9-11 are rejected under 35 U.S.C. 102(e) as being anticipated by Sayers et al. (6,687,243).

Regarding claims 1, 3-4, 9-11, Sayers discloses a method and apparatus for integrated wireless communications in private and public network environments,

comprising stations which operate in accordance with a first radio interface standard and/or a second radio interface standard, and a control station which controls the alternate use of the frequency band (see fig.1, elements 11s, 14, 15, 24s 29, col.4, line 66-col.5, line 67, and its description).

6. Claims 1, 3-4, 9-11 are rejected under 35 U.S.C. 102(e) as being anticipated by Pecen et al. (6,631,259).

Regarding claims 1, 3-4, 9-11, Sayers discloses a method and apparatus for integrated wireless communications in private and public network environments, comprising stations which operate in accordance with a first radio interface standard and/or a second radio interface standard, and a control station which controls the alternate use of the frequency band (see figs.1-2, elements 106, 108, 110, 112, col.1, lines 54-65, col.2, lines 49-59, and its description).

Allowable Subject Matter
